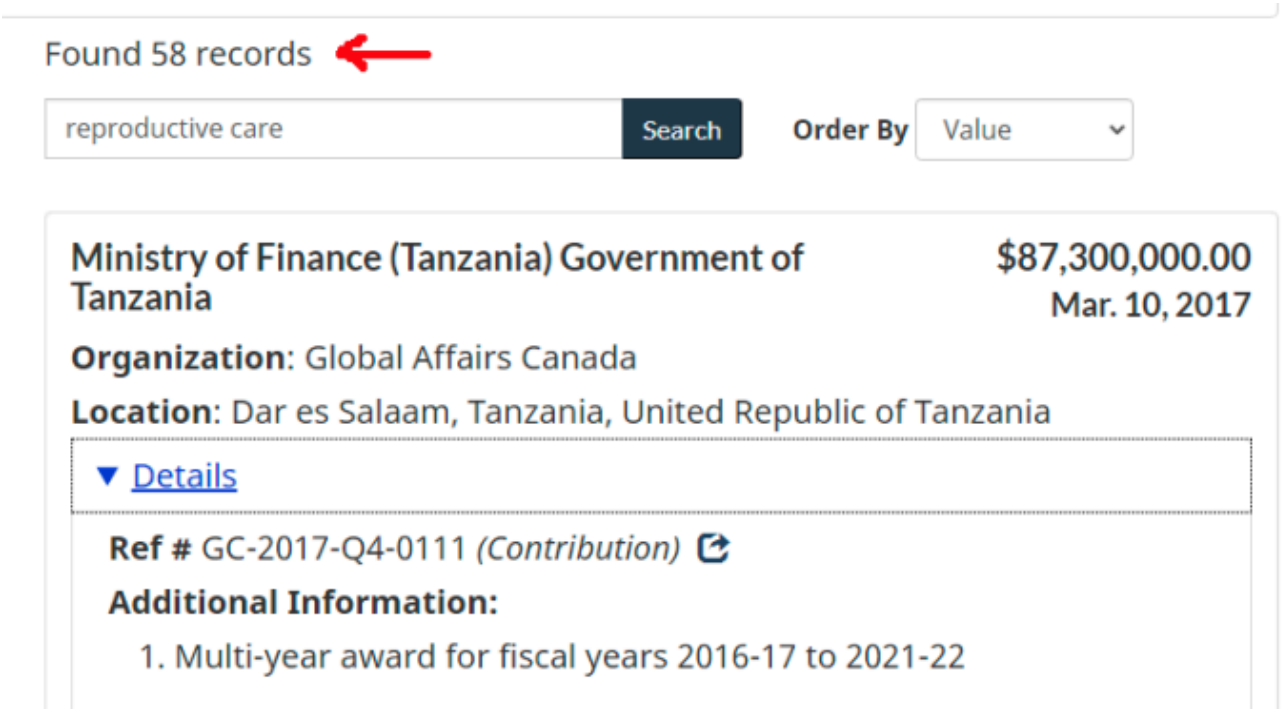
Gates, Trudeau Using Other People's Money To Finance Genocide Globally



It's bad enough that successive Governments waste the public's money. It's far worse when used to finance the genocide of babies, both domestically and abroad. Instead of being direct about this, it's cloaked in misleading labels like "reproductive health". Here are some specific cases.

Bill Gates believes there are too many people on the planet. It's also the case that aborted fetal tissue, (from dead babies), is also used in manufacturing vaccines. If only there was a common solution to all of these problems.

While these groups do serve other purposes, they will often include terms like "sexual rights", or "reproductive care". These are euphemisms for abortion most times.

Conservative Cuckery On Abortion

This is the sad state of "conservatism" in Canada. There's no moral or ideological objection to infanticide. Instead, they choose to virtual signal about how it's wrong to do if it's based on sex. Apparently being viewed as a misogynist is worse than being a murderer.

Males and females are to be treated equally, and apparently that applies to them being equally expendable.

While we're at it, let's see what has been spent Federally on the topic of MAiD, or medical assistance in dying, or euthanasia. 2 of the grants apparently cover mass euthanasia of cattle, and other farm animals.

Definitely some strange uses of taxpayer money.
